

# SiteSentinel - sample monitoring report

Website: sklep-klienta.pl | Period: last 30 days | Generated: 2026-06-27

Business summary: website is stable, SSL renewal should be scheduled, and social sharing metadata should be updated.

Uptime: 99.98 percent | Average response time: 482 ms | SSL: renewal in 18 days | Forms: last demo test passed.

Uptime chart: daily availability stayed near 99.98 percent with one short degradation window.

Response chart: response time ranged from 421 ms to 610 ms and stayed within the accepted operating band.

Security: HTTPS valid, security headers present, no blacklist hit in demo data, file integrity unchanged.

SEO: Open Graph image is missing. Recommendation: add a branded 1200x630 sharing image.

Forms: contact form accepted a controlled demo submission and returned a success state.

Incident timeline:

1. Warning - SSL renewal window. Owner: DevOps. Due: before month end. Retest: pending.
2. Info - Missing Open Graph image. Owner: Marketing. Due: next release. Retest: pending.
3. Resolved - Contact form demo test passed. Owner: Support. Retest: passed.

Recommendations:

- Schedule SSL renewal and confirm automatic certificate rotation.
- Add social preview image and verify page metadata.
- Keep incident history visible in the client report.

Methodology: HTTP availability, TLS metadata, response timing, HTML metadata, form smoke test and incident response.

Disclaimer: this sample report uses demonstration data and does not replace a manual security audit.
